

# Changing Children's Worlds Foundation & TriCity Family Services

Invite All Families to  
A Special Family Program in St. Charles, Illinois

This weekly learning group program offers an enjoyable opportunity to strengthen family relationships, learn and apply empathy-based Child/Parent Development Guidelines, and share experiences with others in a friendly parent group, open to all families, including families with a special needs child.

You will have opportunities:

- To gather and learn with other parents and caregivers
- To share ideas and experiences, supporting each other
- To explore how you can continue to develop in parenting your children
- To give your children the support they need to flourish

THE ICDP Family/Parent/Caregiver program promotes empathy in communications, using eight guidelines to develop and sustain quality interactions between caregivers and their children, for emotional, social, cognitive and regulative growth, to enhance loving families and help children become strong learners, leaders, family members, and friends, which will support their academic achievement.
